Jeremy Grancher

Senior Software Engineer

I've been building for the web for 14 years. Lately that's meant generative AI at Leonardo.ai and Canva, and before that, e-commerce storefronts and loyalty platforms.
I like taking features from 0 to 1: working the problem out with product and design, shipping it, then iterating on it. And I still care a lot about the small details that make an interface feel right.

Professional Experience

Senior software engineer @ Canva

05/26 - Now · Sydney

• Built Canva's official n8n node from scratch, now a verified community node covering the whole Canva Connect API (TypeScript, OAuth 2.0, REST). I wrote the spec, published it on npm with launch templates, and handle user support: n8n-nodes-canva

• Maintain Canva's MCP server in ChatGPT and Claude. I build interactive widgets like the background remover and AI video, along with the upgrade and top-up purchases inside them, and look after analytics, localisation and partner support.

Senior product engineer (web) @ Leonardo.ai (acquired by Canva)

07/24 - 05/26 · Sydney

• Started and led "Model Matrix", a JSON schema-driven platform where one config file per model handles validation, UI and API mapping. Adding a new AI model (Veo 3.1, Nano Banana, Kling...) became a config change rather than custom code.

• Designed its architecture and rolled it out gradually across image and video generation. I mentored teammates through the first implementations and wrote the guides other squads used to add models themselves.

• Owned the web side of big launches like video generation and token-based pricing, alongside product, design and backend. Other squads came to me with their web questions: leonardo.ai

Web developer (freelance) @ Userkind

06/23 - 06/24 · Sydney

• Built custom websites on Next.js and headless CMSs like Sanity and Builder.io, with GSAP or Framer Motion for animation. One example: morcofresh.com.au

• Set up headless Shopify stores and their content models, so clients could run things without needing a developer.

Senior developer (contract) @ Upgrowth

12/22 - 05/23 · Sydney

• Shipped features on BigW's storefront, a big multi-team codebase for one of Australia's largest retailers. Worked in Next.js, TypeScript and SCSS Modules, paying close attention to performance and accessibility: bigw.com.au

Skills

- Agentic coding & MCP
- TypeScript & Node.js
- React & Next.js
- CSS & design systems
- GraphQL & REST APIs

Languages

- French (native)
- English (fluent)
- Japanese (learning)

Hobbies

- Gym & running
- Collecting retro games
- Electronic music

Senior front-end developer (contract) @ Publicis

06/22 - 10/22 · Sydney

• Built Swimming Australia's new website and a component library editors use to put together their own pages, with Next.js, headless WordPress, Emotion and Chakra UI: swimming.org.au

Senior creative developer (contract) @ Nightjar

02/22 - 06/22 · Sydney

• Worked shoulder to shoulder with designers on award-winning websites, built with Next.js, Sanity, headless Shopify, Tailwind and GSAP: nightjar.co

Senior software engineer @ Thinkmill

02/21 - 02/22 · Sydney

• Built new filtering features for SafetyCulture's iAuditor web app with React, Redux and Jest: safetyculture.com

• Worked on the UI platform and design system for Enlitic's medical imaging product, using React, Storybook and Emotion.

Senior product engineer @ ustwo

08/17 - 01/21 · Sydney

• Built Semi Permanent's new website with TypeScript, Next.js, Framer Motion and Contentful's GraphQL API: semipermanent.com

• Prototyped and shipped products for Create with Google, including Audience Connect, an Electron app that adds offline videos and real-time audience interaction to Google Slides, built with Python, Preact and Firebase: create.withgoogle.com

• Built "Card Companion", Qantas' loyalty platform, as part of a cross-functional product team, with React, Next.js, GraphQL and Apollo: cardcompanion.qantas.com

Front-end developer @ holler

05/15 - 08/17 · Sydney

• Built myAudi, Audi Australia's customer loyalty portal, with React, React Router and Redux: myaudi.com.au

• Made campaign sites for Audi Australia, working closely with the design and strategy teams.

Front-end & iOS developer @ Exomind

10/12 - 09/14 · Paris

• Built the news website for TF1, France's biggest TV channel: tf1.fr/news

• Teamed up with TBWA on the mobile site for Paco Rabanne's Invictus fragrance, animated with GSAP: FWA case study

Education

Master in Digital Communication Engineering and Management

HETIC · 2009 - 2012 · Paris

Higher Diploma in Software Design & Development

CESI (formerly eXia.CESI) · 2007 - 2009 · Rouen
