Jeremy Grancher

Senior Software Engineer

Senior software engineer with 14 years of experience building web products: most recently generative AI at Leonardo.ai and Canva, and e-commerce storefronts and loyalty platforms before that.
I lead features from 0 to 1 and own them end-to-end, from shaping the problem with product and design to shipping and iterating, and I still take special care of the little details and interactions.

Professional Experience

Senior software engineer @ Canva

05/26 - Now · Sydney

• Built Canva's official n8n node from scratch: a verified community node covering the whole Canva Connect API (TypeScript, OAuth 2.0, REST), with launch workflow templates. Owned it from spec to npm release and user support: n8n-nodes-canva

• Maintain Canva's MCP server used in ChatGPT and Claude: interactive widgets (background remover, AI video), in-widget upgrade and top-up purchase flows, funnel analytics, localisation and partner support.

Senior product engineer (web) @ Leonardo.ai (acquired by Canva)

07/24 - 05/26 · Sydney

• Initiated and led "Model Matrix", a JSON schema-driven platform where one config file drives validation, UI and API mapping, turning each new AI model launch (Veo 3.1, Nano Banana, Kling...) from bespoke code into configuration.

• Set its architecture and progressive rollout across image and video generation, mentored teammates through the first implementations, and wrote the guides that let other squads add new models on their own.

• Owned the web side of flagship launches such as video generation and token-based pricing, working with product, design and backend, and acting as the go-to web expert for other squads: leonardo.ai

Web developer (freelance) @ Userkind

06/23 - 06/24 · Sydney

• Built bespoke websites using Next.js and headless CMSs like Sanity or Builder.io, with GSAP or Framer Motion animations, e.g. morcofresh.com.au

• Built headless Shopify storefronts and the content models behind them, so clients could run their stores without a developer.

Senior developer (contract) @ Upgrowth

12/22 - 05/23 · Sydney

• Shipped features on BigW's e-commerce storefront, in a large multi-team codebase for one of Australia's biggest retailers, using Next.js, TypeScript & SCSS Modules, with a focus on performance and accessibility: bigw.com.au

Skills

- Agentic coding & MCP
- TypeScript & Node.js
- React & Next.js
- CSS & design systems
- GraphQL & REST APIs

Languages

- French (native)
- English (fluent)
- Japanese (learning)

Hobbies

- Gym & running
- Collecting retro games
- Electronic music

Senior front-end developer (contract) @ Publicis

06/22 - 10/22 · Sydney

• Developed Swimming Australia's new website and the component library letting editors compose their own pages, using Next.js, headless WordPress, Emotion & Chakra UI: swimming.org.au

Senior creative developer (contract) @ Nightjar

02/22 - 06/22 · Sydney

• Developed bespoke and award-winning websites side by side with designers, using Next.js, Sanity.io, Shopify (headless), Tailwind and GSAP animations: nightjar.co

Senior software engineer @ Thinkmill

02/21 - 02/22 · Sydney

• Built new filtering features for SafetyCulture's iAuditor web app, using React, Redux and Jest: safetyculture.com

• Evolved the UI platform and design system of Enlitic's medical imaging product, using React, Storybook & Emotion.

Senior product engineer @ ustwo

08/17 - 01/21 · Sydney

• Built Semi Permanent's new website using TypeScript, Next.js, Framer Motion and Contentful's GraphQL API: semipermanent.com

• Prototyped and shipped Create with Google products, including Audience Connect, an Electron app adding offline videos and real-time audience interactions to Google Slides (Python, Preact, Firebase): create.withgoogle.com

• Built the Qantas loyalty platform "Card Companion" in a cross-functional product team, using React, Next.js, GraphQL and Apollo: cardcompanion.qantas.com

Front-end developer @ holler

05/15 - 08/17 · Sydney

• Built myAudi, Audi Australia's customer loyalty portal, using React, React-Router and Redux: myaudi.com.au

• Developed campaign websites for Audi Australia, working closely with design and strategy teams.

Front-end & iOS developer @ Exomind

10/12 - 09/14 · Paris

• Built the news website of TF1, France's first TV channel: tf1.fr/news

• Developed, with TBWA, the promotional mobile website for Paco Rabanne's Invictus fragrance, using GSAP: FWA case study

Education

Master in Digital Communication Engineering and Management

HETIC · 2009 - 2012 · Paris

Higher Diploma in Software Design & Development

CESI (formerly eXia.CESI) · 2007 - 2009 · Rouen
