Jeremy Grancher

Senior Product Engineer

I am a senior product engineer with 14 years of experience building for the web, from award-winning websites to e-commerce and generative AI products.
I own features end-to-end, from shaping the problem with product and design to shipping and iterating, and I still take special care of the little details and interactions.

Professional Experience

Canva

05/26 - Now
Sydney

Senior software engineer @ Canva

• Shipped Canva's official n8n node, a verified community node covering the whole Canva Connect API, with launch workflow templates. Owned it from spec to npm release and user support: n8n-nodes-canva

• Maintaining the Canva MCP server used in ChatGPT and Claude: interactive widgets (background remover, AI video with in-widget upgrade and top-up flows), funnel analytics, localisation and partner support.

Leonardo.ai

07/24 - 05/26
Sydney

Senior product engineer (web) @ Leonardo.ai

• Initiated and led "Model Matrix", a schema-driven platform where one config file drives validation, UI and API mapping, turning each new AI model launch (Veo 3.1, Nano Banana, Kling...) from bespoke code into configuration.

• Owned the web side of flagship launches such as video generation and token-based pricing, working with product, design and backend, and acting as the go-to web expert for other squads: leonardo.ai

06/23 - 06/24
Sydney

Web developer (freelance) @ Userkind

• Built bespoke websites using Next.js and headless CMSs like Sanity or Builder.io, with GSAP or Framer Motion animations, ie: morcofresh.com.au

• Built headless Shopify storefronts and the content models behind them, so clients could run their stores without a developer.

12/22 - 05/23
Sydney

Senior developer (contract) @ Upgrowth

• Developed BigW's e-commerce storefront using Next.js, TypeScript & SCSS Modules: bigw.com.au

• Shipped features in a large multi-team codebase for one of Australia's biggest retailers, with a focus on performance and accessibility.

06/22 - 10/22
Sydney

Senior front-end developer (contract) @ Publicis

• Developed Swimming Australia's new website using Next.js, headless WordPress, Emotion & Chakra-UI: swimming.org.au

• Built the component library and content blocks letting editors compose their own pages in WordPress.

NIGHTJAR

02/22 - 06/22
Sydney

Senior creative developer (contract) @ Nightjar

• Developed bespoke and award-winning websites using Next.js, Sanity.io, Shopify (headless), Tailwind and GSAP animations: nightjar.co

• Worked side by side with designers to prototype, refine and polish interactions and animations.

tm

02/21 - 02/22
Sydney

Senior software engineer @ Thinkmill

• Built new filtering features for SafetyCulture's iAuditor web app, using React, Redux and Jest: safetyculture.com

• Evolved the UI platform and design system of Enlitic's medical imaging product, using React, Storybook & Emotion.

ustwo

08/17 - 01/21
Sydney

Senior product engineer @ ustwo

• Development of Semi Permanent's new website using TS, Next.js, Framer-Motion and Contentful's GraphQL API: semipermanent.com

• Prototyped and shipped Create with Google products, including Audience Connect, an Electron app adding offline videos and live audience interactions to Google Slides (Python, Preact, Firebase): create.withgoogle.com

• Built the Qantas loyalty platform "Card Companion" in a cross-functional product team, using React, Next.js, GraphQL and Apollo: cardcompanion.qantas.com

hŏl'ər

05/15 - 08/17
Sydney

Front-end developer @ holler

• Built myAudi, Audi Australia's customer loyalty portal, using React, React-Router and Redux: myaudi.com.au

• Developed campaign websites for Audi Australia, working closely with design and strategy teams.

exomind

10/12 - 09/14
Paris

Front-end & iOS developer @ Exomind

• Built the news website of TF1, France's first TV channel: tf1.fr/news

• Developed, with TBWA, the promotional mobile website for Paco Rabanne's Invictus fragrance, using GSAP: FWA case study.

Education

HETIC

Master in Digital Communication Engineering and Management
